Profile

Results-driven Frontend developer with 4 years of experience developing dynamic user interfaces and websites using Vue.js, Nuxt.js, Bootstrap, and Vuetify. At Codematics, independently launched the company's website, revamped Kardaan admin panel for faster load time, and created premium resume templates that increased app downloads by 30%. Looking to help build innovative and impactful projects as a Vue.js developer.

Employment History

Frontend Developer, Codematics, Abbottabad (Hybrid)

October 2019 — May 2023

- Developed the company's website independently, utilizing a tech stack of Nuxt.js, Vuetify, and Strapi, resulting in a successful launch on May 2023, a 20% increase in website traffic, and positive user feedback on the visually appealing interface.
- Collaborated with another developer to restructure Kardaan admin panel's front-end using Vue.js and Bootstrap, resulting in a 30% faster page load time and enhanced user satisfaction with seamless integration of REST APIs.
- Designed and produced a collection of 7 premium resume templates for the CV Maker app, leveraging HTML and Bootstrap, resulting in a 30% increase in app downloads and a 10% boost in user engagement.

IT Analyst Intern, OMERS, Toronto (On-site)

May 2018 — August 2018

- Provided technical support to 250+ users in a professional office environment and remote support to multiple international offices, ensuring seamless operations and resolving issues with an average response time of 10 minutes.
- Introduced an Excel-based equipment inventory by performing a meticulous physical count of more than 900 items. Maintained and updated the inventory throughout the internship, achieving an impressive 99.5% accuracy rate.
- Upgraded two outdated SharePoint knowledge base documents, modernizing steps to align with latest software standards. Which resulted in an impressive 80% reduction in time spent resolving repetitive issues.

- Authored a PowerShell script that automated Active Directory group membership retrieval. The script efficiently analyzed membership for 250+ employees in 5 minutes and recorded results in a CSV file.

IT Desktop Support Intern, Caseware, Toronto (On-site)

January 2017 — August 2017

- Saved $7,277 CAD for Caseware by effectively organizing the existing equipment inventory, enabling IT staff to locate items efficiently and avoid unnecessary purchases.
- Configured and launched an office floor plan mapper system, resulting in a significant reduction of approximately 50% in response times for in-person support calls received by our help desk team.
- Efficiently executed the migration of over 1500 IT knowledge base documents, from an outdated Plone-based system to a cloud-based platform, AODocs. Achieved a seamless transition with zero data loss, enabling access to critical information and boosting team productivity.
- Reformatted 700+ migrated documents, fixed links, styled headings, and added bullet points, improving readability and user experience.

Education

Ontario College Advance Diploma in Computer Systems Technology, Seneca College, Toronto

September 2015 — June 2019

- Graduated with high honors, achieving a perfect cumulative GPA of 4.0/4.0.
